# **2<sup>nd</sup> Quarter 2011 Financial Results Presentation**

**August 8, 2011**

**STIFEL  
FINANCIAL**

# Forward-Looking Statements

This presentation may contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 that involve significant risks, assumptions, and uncertainties, including statements relating to the market opportunity and future business prospects of Stifel Financial Corp., as well as Stifel, Nicolaus & Company, Incorporated and its subsidiaries (collectively, “SF” or the “Company”). These statements can be identified by the use of the words “may,” “will,” “should,” “could,” “would,” “plan,” “potential,” “estimate,” “project,” “believe,” “intend,” “anticipate,” “expect,” and similar expressions. In particular, these statements may refer to our goals, intentions, and expectations, our business plans and growth strategies, our ability to integrate and manage our acquired businesses, estimates of our risks and future costs and benefits, and forecasted demographic and economic trends relating to our industry.

You should not place undue reliance on any forward-looking statements, which speak only as of the date they were made. We will not update these forward-looking statements, even though our situation may change in the future, unless we are obligated to do so under federal securities laws.

Actual results may differ materially and reported results should not be considered as an indication of future performance. Factors that could cause actual results to differ are included in the Company’s annual and quarterly reports and from time to time in other reports filed by the Company with the Securities and Exchange Commission and include, among other things, changes in general economic and business conditions, actions of competitors, regulatory and legal actions, changes in legislation, and technology changes.

# Non-GAAP Financial Measures

The company utilized non-GAAP calculations of presented net revenues, compensation and benefits, non-compensation operating expenses, income before income taxes, provision for income taxes, net income, compensation and non-compensation operating expense ratios, pre-tax margin and diluted earnings per share as an additional measure to aid in understanding and analyzing the company's financial results for the three and six months ended June 30, 2011 and 2010 and the three months ended March 31, 2011. Specifically, the company believes that the non-GAAP measures provide useful information by excluding certain items that may not be indicative of the company's core operating results and business outlook. The company believes that these non-GAAP measures will allow for a better evaluation of the operating performance of the business and facilitate a meaningful comparison of the company's results in the current period to those in prior periods and future periods. Reference to these non-GAAP measures should not be considered as a substitute for results that are presented in a manner consistent with GAAP. These non-GAAP measures are provided to enhance investors' overall understanding of the company's current financial performance. These non-GAAP amounts exclude legal-related expenses associated with the SEC investigation and civil lawsuit in connection with the ongoing matter with five Southeastern Wisconsin school districts and certain compensation and non-compensation operating expenses associated with the merger of TWPG.

A limitation of utilizing these non-GAAP measures of net revenues, compensation and benefits, non-compensation operating expenses, income before income taxes, provision for income taxes, net income, compensation and non-compensation operating expense ratios, pre-tax margin and diluted earnings per share is that the GAAP accounting effects of these merger-related charges do in fact reflect the underlying financial results of the company's business and these effects should not be ignored in evaluating and analyzing its financial results. Therefore, the company believes that GAAP measures of net revenues, compensation and benefits, non-compensation operating expenses, income before income taxes, provision for income taxes, net income, compensation and non-compensation operating expense ratios, pre-tax margin and diluted earnings per share and the same respective non-GAAP measures of the company's financial performance should be considered together.

## Chairman's Comments

“Second quarter results improved over the year-ago period, but were impacted by a challenging market environment dominated by macroeconomic factors, and significant non-core expenses primarily related to additional legal reserves in connection with previously disclosed matters. Despite these factors, our investment banking group generated their second best revenue quarter, which was offset by pressure in our brokerage and private client businesses due to a lack of investor conviction coupled with lower industry-wide volumes. We continue to position the firm for long-term growth and our recent announcement of the pending acquisition of Stone & Youngberg delivers on this strategy by adding public finance expertise and coverage in new markets. We are excited about combining our highly complementary businesses and delivering enhanced services to both our institutional and wealth management clients”
