Guide to the Markets – U.S. Data are as of June 16, 2023.

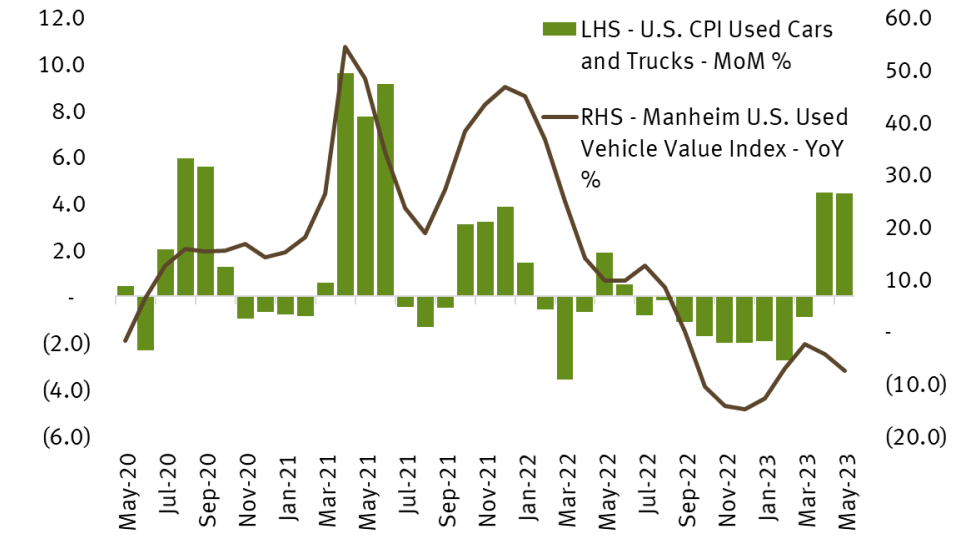

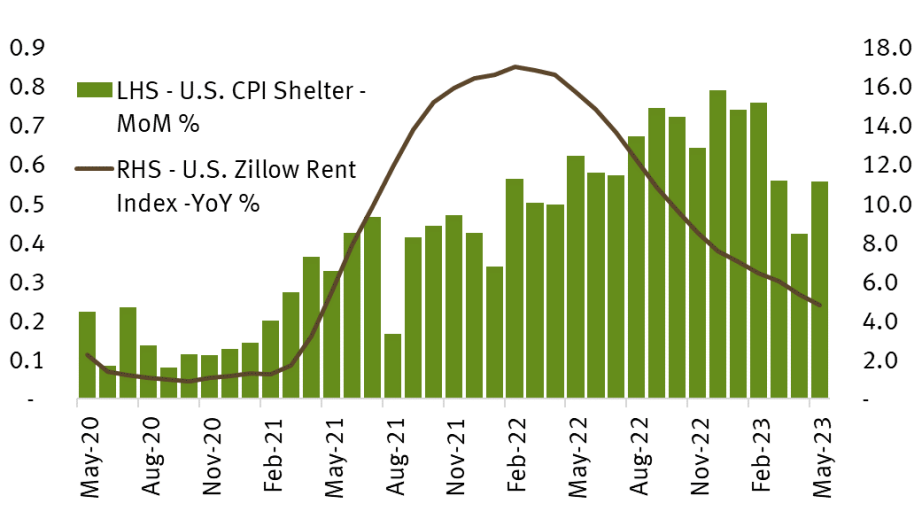

S&P 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. Indices are unmanaged, do not reflect fees and expenses, and are not available for direct investment. Past performance does not guarantee future results. Investing involves risk, including the possible loss of principal. Asset allocation and diversification do not ensure a profit or protection against loss.

Inflation and Fed Policy

Real-time inflation data vs. Consumer Price Index (CPI)

Source: Stifel CIO Office via Bloomberg, as of June 22, 2023 PPI = Producer Price Index

JOLTs - Job Openings (000,000s)

Nonfarm Payrolls (000s)

Jobless Claims (000s)

Wage Growth - Hourly Earnings (%)

Source: Stifel CIO Office via Bloomberg, as of June 22, 2023

Fed's Dual Mandate

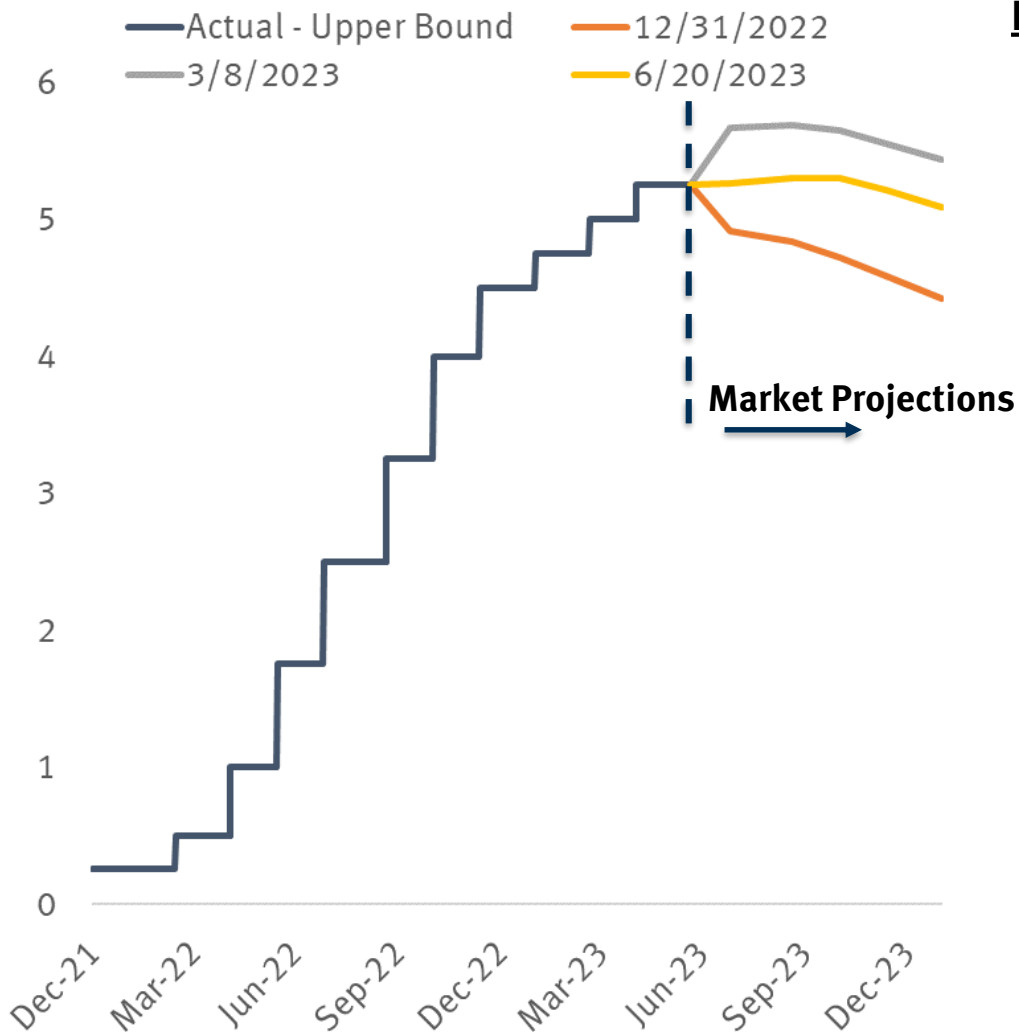

Price Stability: 2%

- Wage pressures subside
- Food/shelter/core goods prices ease
- Supply chain pressures ease
- Inflation expectations fall towards 2%
- Monthly Consumer Price Index (CPI) trends lower
- Monthly Personal Consumption Expenditures (PCE) trends lower

Maximum Employment

- Job quits slow
- Initial jobless claims rise
- Unemployment to job openings ratio declines
- Unemployment above 4.4%
- Severe financial conditions
- Deep recession

Fed Funds Rate

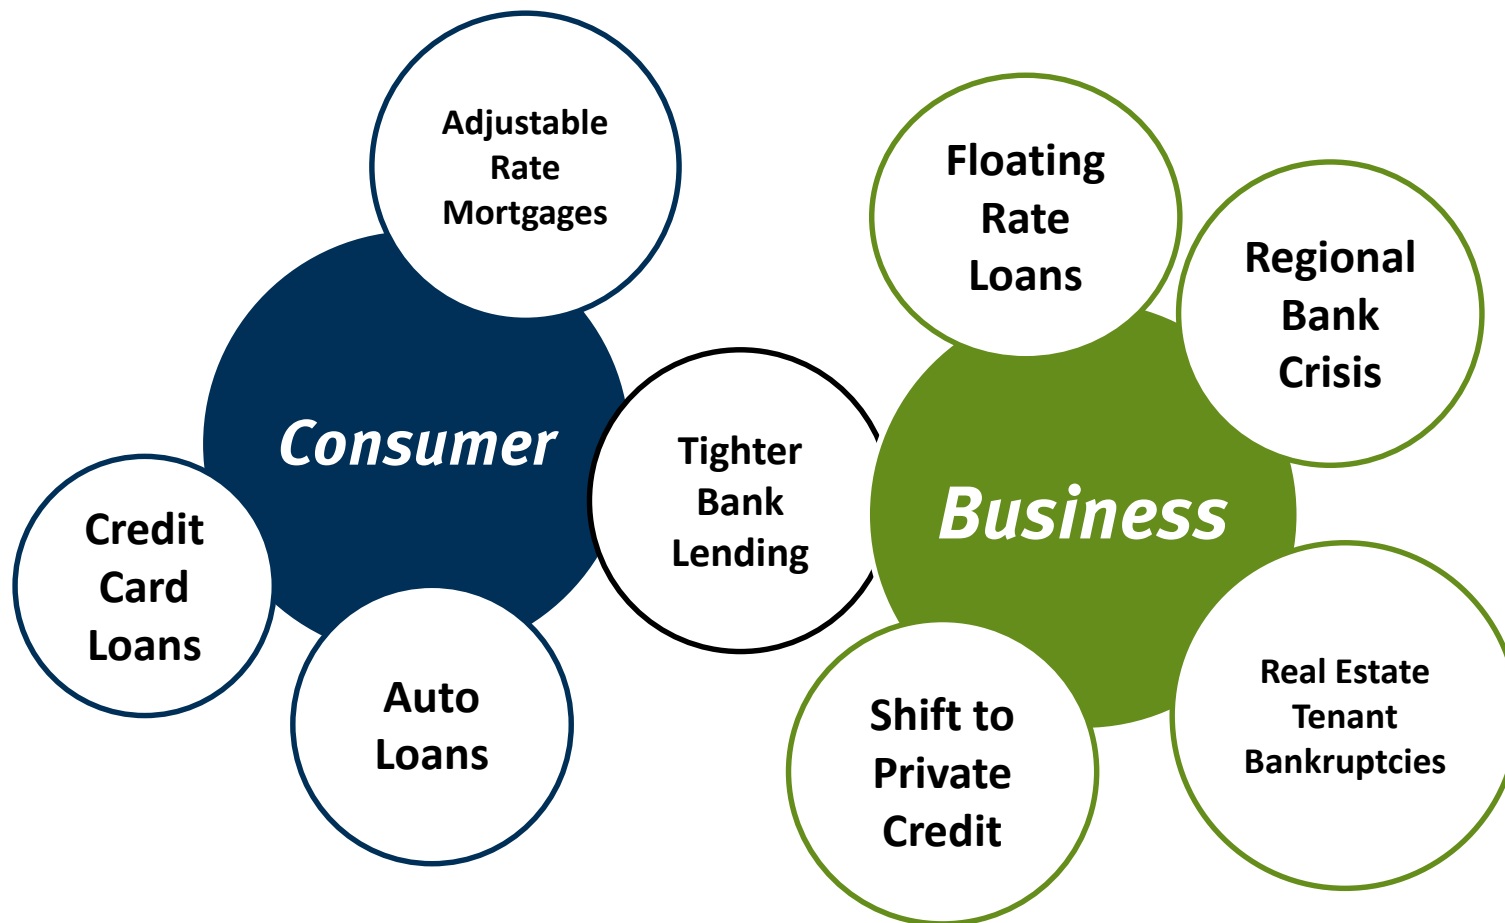

Source: Stifel CIO Office via Bloomberg, as of June 20, 2023 (intra-day)

Learnings From the Fed Meeting

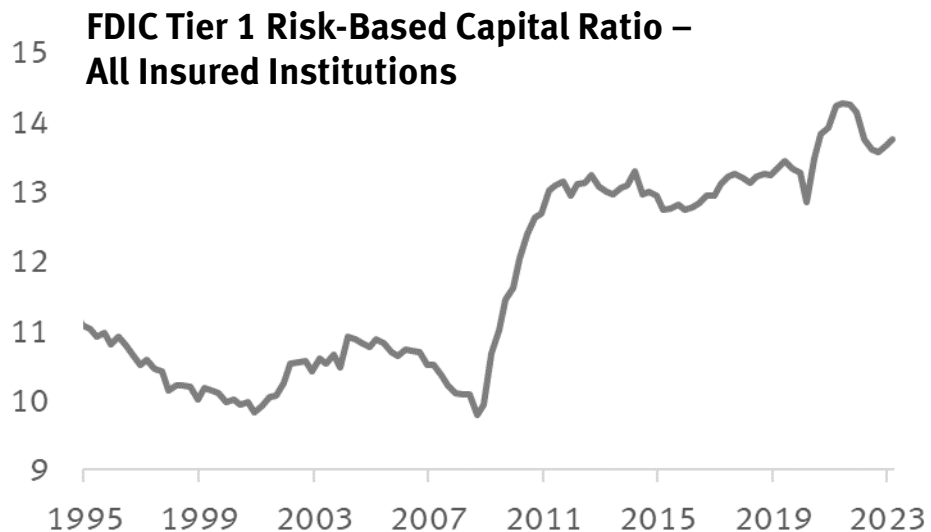

- Rates unchanged, dot-plot **shows two more hikes. No rate cuts** projected this year.
- **GDP higher: 1.0% vs. 0.4% in March**
Small changes for 2024 and 2025.
- **Unemployment lower: 4.1% vs. 4.5% in March**
Rise to 4.5% at year-end 2024 and 2025.
- **Headline inflation lower: 3.2% vs. 3.3% in March**
- **Core inflation higher: 3.9% vs. 3.6% in March**
- **Headline and core inflation are expected to fall** to 2.5% and 2.6% in 2024, respectively, and 2.1% and 2.2% in 2025, respectively.

Higher Rates Present Challenges

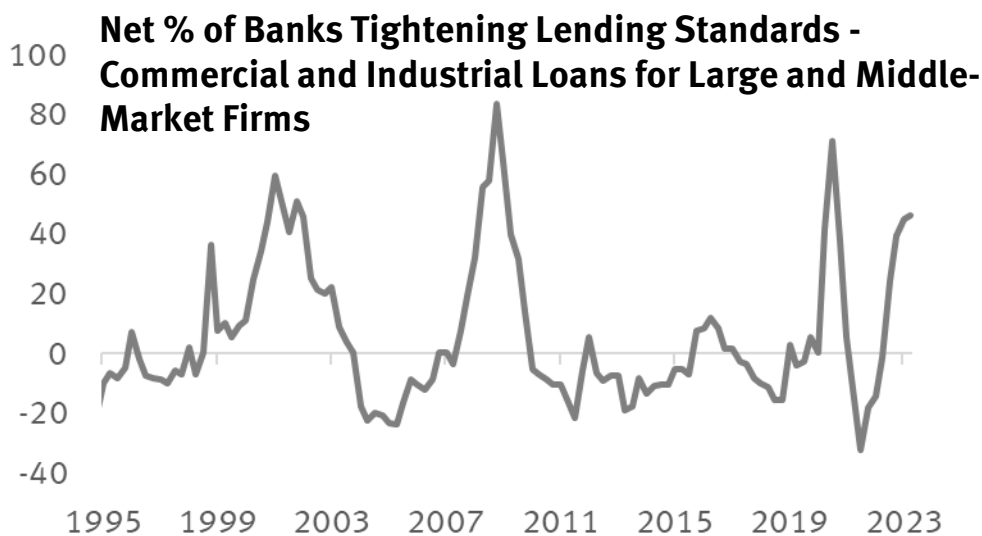

Source: Stifel CIO Office via Bloomberg, as of June 22, 2023

“The U.S. banking system is sound and resilient” – Federal Open Market Committee (FOMC) Statement

Learnings From Fed Financial Stability Report

- Banks in the aggregate “well capitalized”
- Overall vulnerability to future credit losses is moderate
- Lending standards for bank commercial and industrial loans have tightened
- Common equity Tier 1 (CET1) – close to median of its range since the end of the Financial Crisis
- Survey of salient risks to financial stability
 1. Persistent inflation and monetary tightening
 2. Stress in banking sector
 3. Commercial real estate
 4. Geopolitical risks
 5. Debt limit

Retail Sales Year Over Year (YoY)

Politics and Geopolitics

SECOND HALF FOCUS – WASHINGTON D.C.

- **Government Shutdown** - Low odds, but not zero
- **Defense spending and Ukraine** – disagreements still exist
- **China outbound investment rules**- creating a process to vet outbound investments in China
- **Student loan forgiveness** – Supreme Court likely to block the administration’s plan
- **Business tax legislation** – talks to suspend some business-related tax changes
- **M&A** – potential changes to merger guidelines
- **Banking Regulation** –banks with > \$100 billion in assets
- **Deposit Insurance**- limited political will
- **SAFE Banking Act** – might be a “must-pass” bill
- **MiFID II** – unlikely to pass
- **Cryptocurrency** - watch for enforcement actions

DEBT CEILING DEAL

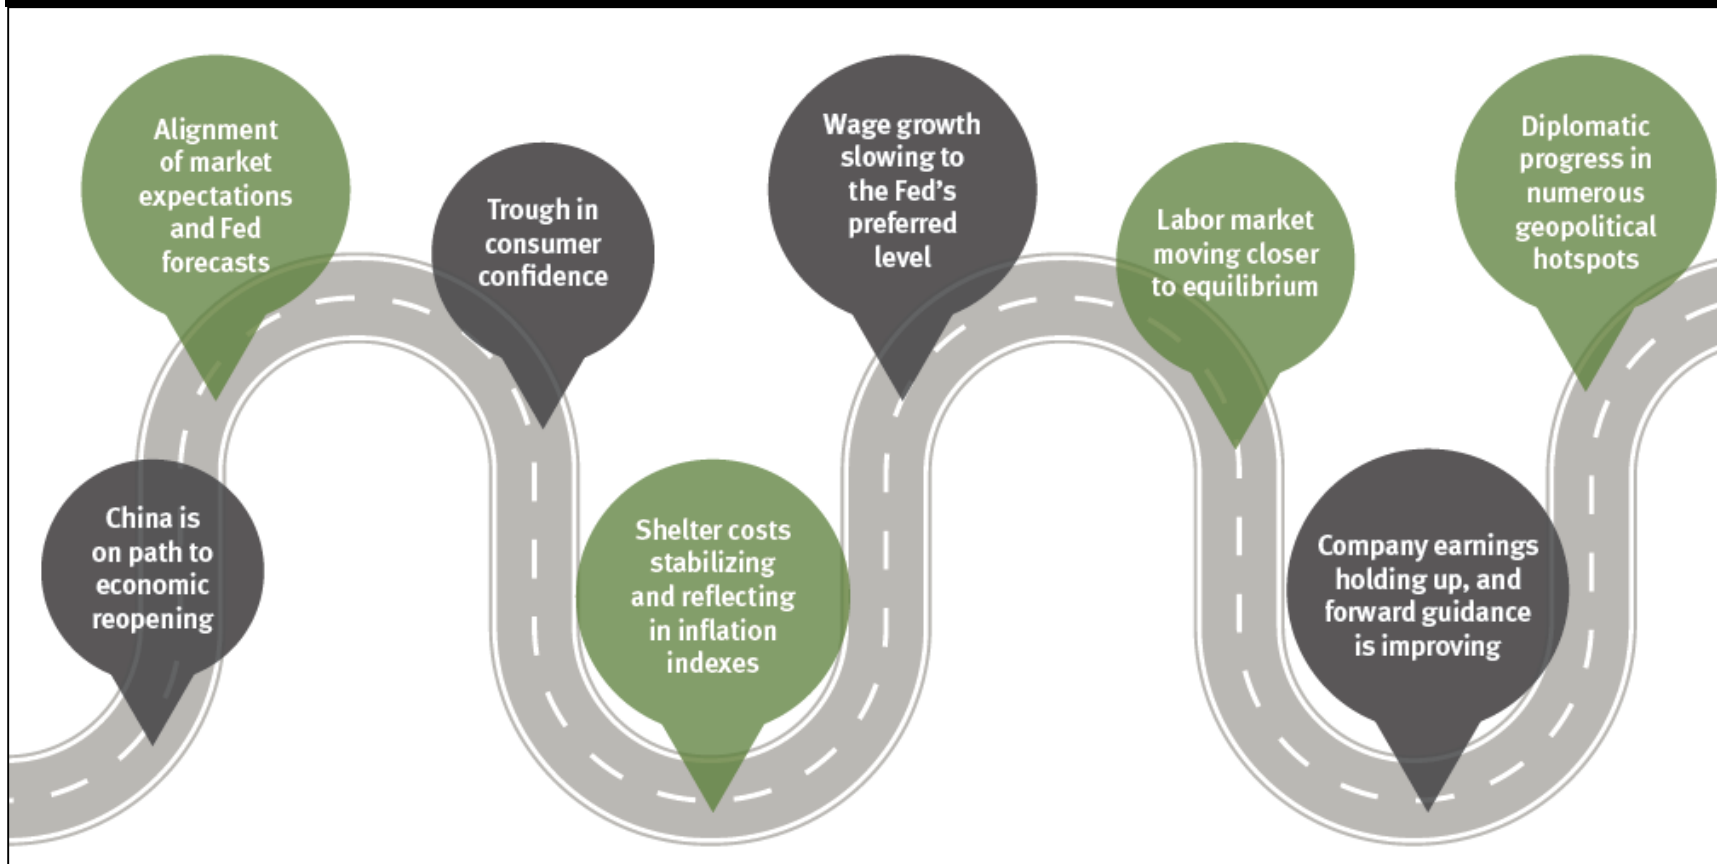

- Suspends debt limit until January 2025
- Budget cuts and caps on non-defense spending
- Rescinds \$28 billion in COVID-19 relief funds
- Borrowers to start paying back student loans

U.S. – CHINA RELATIONS

- Relationship strained
 - Spy balloons
 - China military facility in Cuba
 - U.S. – Taiwan Initiative on 21st Century Trade
- Secretary of State Blinken visit to China
 - First visit in 5 years, both sides agreed to talk further
 - Will “compete vigorously”...but seek to “reduce risk of miscalculation”

Global earnings estimates

May 2003 = 100, next 12 months consensus estimates, U.S. dollars

Global valuations

Current and 25-year next 12 months price-to-earnings ratio

Source: FactSet, MSCI, Standard & Poor's, Thomson Reuters, J.P. Morgan Asset Management.

Next 12 months consensus estimates are based on pro-forma earnings and are in U.S. dollars. MSCI Europe includes the eurozone as well as countries not in the currency bloc, such as Norway, Sweden, Switzerland and the UK (which collectively make up 44% of the overall index). The purple lines for EM and China show 20-year averages due to a lack of available data. Past performance is not a reliable indicator of current and future results.

Guide to the Markets – U.S. Data are as of June 21, 2023.

Long-Term Themes

THE FIVE THEMES

FOURTH INDUSTRIAL REVOLUTION

Technological innovation has broken down the boundaries between the physical, digital, and biological worlds.

- Data as a Commodity
- Enhanced Computing
- Workforce Optimization
- Future of Transportation

SECURING STRATEGIC RESOURCES

Companies and governments are prioritizing the development and protection of critical industries, resources, and services.

- Food and Water Security
- Net Zero Movement
- Renewable Energy
- Circular Economy

SHIFTING DEMOGRAPHICS

Changes in global population dynamics will bring about challenges and opportunities.

- Millennials
- Emerging Global Middle Class
- Aging Population
- Future of Health

THE NEW CONSUMER

Consumer preferences, expectations, and behavior are altering business models and corporate strategies.

- Reimagined Convenience
- Digitalization of Human Connectivity
- Future of Finance
- Future of Leisure

PRODUCTIVE COMPETITION

Rivalry ultimately drives innovation, improves quality of life, and creates value for consumers and the economy.

- The New Cold War
- Geopolitical Tensions
- Localization
- Transforming Business Models

Get to Know Our Long-Term Investment Themes

FOURTH INDUSTRIAL REVOLUTION

5

Technological innovation has broken down the boundaries between the physical, digital, and biological worlds.

Future of Transportation

Innovative technologies and infrastructure that facilitate **sustainable, autonomous, and connected mobility solutions.**

As all modes of transportation taken together account for **37% of global greenhouse gas emissions**, the sector is a key target for **emissions-reduction activity**

Teslas have driven over **three billion miles in autopilot mode** since 2014

1 in 10 vehicles are expected to be **autonomous** by 2030

Between 2017 and 2020, **24 U.S. states** enacted **commercial autonomous vehicles legislation**

Enhanced Computing

The development of **powerful computing systems**, such as **quantum computing** and **artificial intelligence**, to tackle complex problems, process vast amounts of data, and drive innovation.

35% of **businesses** worldwide used **AI** in 2022

The **global artificial intelligence market** is expected to reach **\$1.6 trillion** by 2030

In **200 seconds**, a **quantum computer** can solve a problem that the world's current **fastest computer** would need **10,000 years** to compute

Sources: International Energy Agency (IEA), Tesla, Statista, National Conference of State Legislatures

Sources: IBM, Precedence Research, Google

Get to Know Our Long-Term Investment Themes

FOURTH INDUSTRIAL REVOLUTION

4

Technological innovation has broken down the boundaries between the physical, digital, and biological worlds.

Data as a Commodity

Data's ability to provide **insights into consumer behavior, market trends, and operational efficiencies** is valuable for **decision-making**. The size, speed, and complexity of the data we generate requires **significant processing power, storage capabilities, and security**.

**2.5 billion
gigabytes (GB)**

of data are created each day.
That's equivalent to more than
19 million 128GB iPhones

Google processes over

99,000

searches every second

90% of the world's data
has been created
since 2019

Source: Oberlo, Forbes

Workforce Optimization

Improving **productivity and efficiency** through technology, automation, and data.

80% 

Improvement in productivity
through the **use of robots** in the
automotive industry

 **~50%**

of **current work activities** are
technically **automatable** by
adapting current technologies

Source: McKinsey & Company

- Various **yield curve** indicators suggest +50% probability of recession.
- **Credit spreads** have repriced on increased economic uncertainty. Overall bank deposits remain stable, but some pockets of risk exist.
- **Money supply** growth continues to be negative; but, levels of high liquidity remain on Fed's balance sheet.
- **Wage growth** slowing but continue to contribute to inflationary pressures.
- **Commodities** are lower on recession fears and energy market volatility.
- **Inflation** is still sticky, with modest progress.
- **Housing starts** boosted by low inventory.
- **Jobless claims** beginning to show signs of labor market growth slowdown.
- Overall **retail sales** remain supported by lower but positive consumer spending.
- **Job sentiment** continues to decelerate.
- **ISM New Orders** show volatility with both manufacturing and services sectors presenting downside risk.
- **Profit margins** remain historically high but risks are meaningful due to price pressures.
- **Truck shipments** are weak despite the stabilization of supply chain pressures.

EARLY Acceleration in economic growth	MID Positive, but moderating growth	LATE Growth rate slows to trend or below-trend	RECESSION Growth contracts
Lower consumer spending	Recovering consumer spending	Strong consumer spending	Falling consumer spending
Credit creation low	Credit creation rising	Credit creation rising faster	Credit creation declining
Company profits recovering	Company profits peaking	Company profits under pressure	Company profits contracting
Fiscal/monetary policy accommodative	Fiscal/monetary policy shifting to neutral	Fiscal/monetary policy contractionary	Fiscal/monetary policy easing

Dynamic leanings

144 ASSET ALLOCATION MODELS FOR YOUR SELECTION

DYNAMIC LEANINGS

 Underweight
  Neutral
  Overweight

ASSET CLASS	CURRENT	COMMENTS
U.S. Equity vs. Non-U.S. Equity		While non-U.S. equity relative valuations remain attractive for longer-term investors, we remain neutral given the global economic and geopolitical headwinds. The strength of the U.S. consumer and corporate balance sheets put the U.S. on a stronger footing, but richer valuations mean near-term weakness is possible.
U.S. Large Cap vs. U.S. Small Cap		Small cap company valuations are providing an attractive entry point for skilled investors. Falling prices reflect, to a good degree, the concerns about higher interest rates and an economic slowdown. But lower valuations create opportunities. We guide investors to implement an overweight with active management.
U.S. Large Value vs. U.S. Large Growth		In this environment we believe investors should diversify across both value and growth styles. Within U.S. large cap, we have a modest overweight to dividend growth and quality companies, regardless of style.
Non-U.S. Developed Markets vs. Emerging Markets		Risks stemming from China and the war in Ukraine are each binary, meaning one or both could quickly dissipate, or get worse. Our team is closely following the developments in China and Europe, and we are prepared to act swiftly as we receive further clarity on the macroeconomic outlook.
Europe vs. Japan		We see investment opportunities across regions of the world. Japan's corporate governance reform is a positive and likely to enhance shareholder value in the medium-to-long term. Risks from the war in Ukraine are largely reflected in European stock valuations, and there is meaningful upside potential if and when we see a diplomatic resolution there.

EQUITY

DYNAMIC LEANINGS				 Underweight	 Neutral	 Overweight	
ASSET CLASS	CURRENT			COMMENTS			
FIXED INCOME	U.S. Investment Grade vs. U.S. High Yield				Bond yields are the most attractive they have been in the last 10–15 years, despite coming off of recent highs. Near-term volatility and an economic slowdown may exacerbate near-term price losses in high yield.		
	Corporates/ Government/Agency MBS				While our base case is for Treasury yields and corporate spreads to remain range bound, we remain neutral and diversified across fixed income supersectors given the fat tail risks of our bear and bull scenarios.		
	Duration				We view duration as a diversifier in a multi-asset class portfolio given the near-term uncertainty and remain neutral to the overall market.		
ALTERNATIVES	Private Assets				For investors interested in alternative investments and able to handle illiquidity, exposure to some combination of private equity, private debt, and/or private real estate can be considered as part of a diversified portfolio.		
	Hedge Funds				For investors interested in alternative investments and able to handle less liquidity who have conviction about manager skill, exposure to hedge funds can be a helpful part of a diversified portfolio. This is especially true in volatile, low-return environments.		

Past performance is no guarantee of future results.

Index returns include the reinvestment of dividends but do not include adjustments for brokerage, custodian, and advisory fees.

Indices are unmanaged, do not reflect fees and expenses, and are not available for direct investment.

Past performance does not guarantee future results. Investing involves risk, including the possible loss of principal. Asset allocation and diversification do not ensure a profit or protection against loss.

Alternative Investments or Non-Traditional Assets – Alternative investments may include, but are not limited to: Real Estate Investment Trusts (REITs), Commodities, Futures, Hedge Funds, Venture Capital, Limited Partnerships, etc.

Real Estate – When investing in real estate companies, property values can fall due to environmental, economic, or other reasons, and changes in interest rates can negatively impact the performance.

Commodities and Futures – The risk of loss in trading commodities and futures can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition. The high degree of leverage that is often obtainable in commodity trading can work against you as well as for you. The use of leverage can lead to large losses as well as gains.

Hedge Funds – *Investors should be aware that hedge funds often engage in leverage, short-selling, arbitrage, hedging, derivatives, and other speculative investment practices that may increase investment loss. Hedge funds can be highly illiquid, are not required to provide periodic pricing or valuation information to investors, and often charge high fees that can erode performance. Additionally, they may involve complex tax structures and delays in distributing tax information. While hedge funds may appear similar to mutual funds, they are not necessarily subject to the same regulatory requirements as mutual funds.*

Venture Capital – Venture capital investments involve substantial risks. The risks associated with investing in companies in the start-up or expansion stages of development are greater than those of companies in later stages, because the companies' business concepts generally are unproven and the companies have little or no track record.

Limited Partnerships – Generally, limited partnership investments are suitable only for a narrow class of relatively sophisticated investors. Limited partnership investments may be speculative in nature and be subject to resale restrictions or illiquidity. An investment is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment.

Bonds – When investing in bonds, it is important to note that as interest rates rise, bond prices will fall. High-yield bonds have greater credit risk than higher quality bonds.

Duration – Duration is a measure of the sensitivity of the price -- the value of principal -- of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years.

Standard Deviation – Standard deviation is a measure of the dispersion of a set of data from its mean. It is calculated as the square root of variance by determining the variation between each data point relative to the mean. If the data points are further from the mean, there is higher deviation within the data set.

International and Emerging Markets – There are special considerations associated with international investing, including the risk of currency fluctuations and political and economic events. Investing in emerging markets may involve greater risk and volatility than investing in more developed countries.

Private Equity – *Private equity funds are not appropriate for all investors. Investors should be aware that private equity funds may contain speculative investment practices that can lead to a loss of the entire investment. Private equity funds may invest in entities in which no secondary market exists and, as such, may be highly illiquid. The funds are not required to provide periodic pricing or valuation information to investors and often charge high fees that can erode performance. Additionally, they may involve complex tax structures and delays in distributing tax information.*

Short Positions – The investor should note that when a short position moves in an unfavorable way, the losses are theoretically unlimited. The broker will demand more collateral and the manager might have to close out that short position at an inopportune time to limit any further losses.

Small Company Securities – Small company securities are typically more volatile and carry additional risks, since smaller companies generally are not as well established as larger companies.

Bloomberg U.S. Treasury Bills 1-3 Months Index includes all publicly issued zero-coupon U.S. Treasury Bills that have a remaining maturity of less than three months and more than one month, are rated investment grade, and have \$250 million or more of outstanding face value.

Bloomberg U.S. Corporate IG Index is an unmanaged index considered representative of fixed-rate investment-grade taxable bond debt.

Bloomberg U.S. Aggregate Corporate Index is an unmanaged index considered representative of fixed-rate investment-grade taxable bond debt.

Bloomberg U.S. Corporate High Yield is an unmanaged index considered representative of fixed-rate, noninvestment-grade debt.

Bloomberg U.S. Government Bond Index is an unmanaged index considered representative of fixed-rate, investment-grade US Government debt.

Bloomberg Global Aggregate This index provides a broad-based measure of the global investment-grade, fixed-rate debt market.
